Audit & Recovery Strategy — v3

IaaC Tools / Recovery Suite — Unified Resilience Architecture

Purpose: Integrate Audit and Recovery pipelines under a unified framework with AI Sentinel oversight.

***Trigger Scenarios**:*

1. Post-backup verification
2. Periodic integrity audits
3. Pre-recovery validation

***Audit Pipeline (A1–A7)** — Integrity and Compliance Checks*

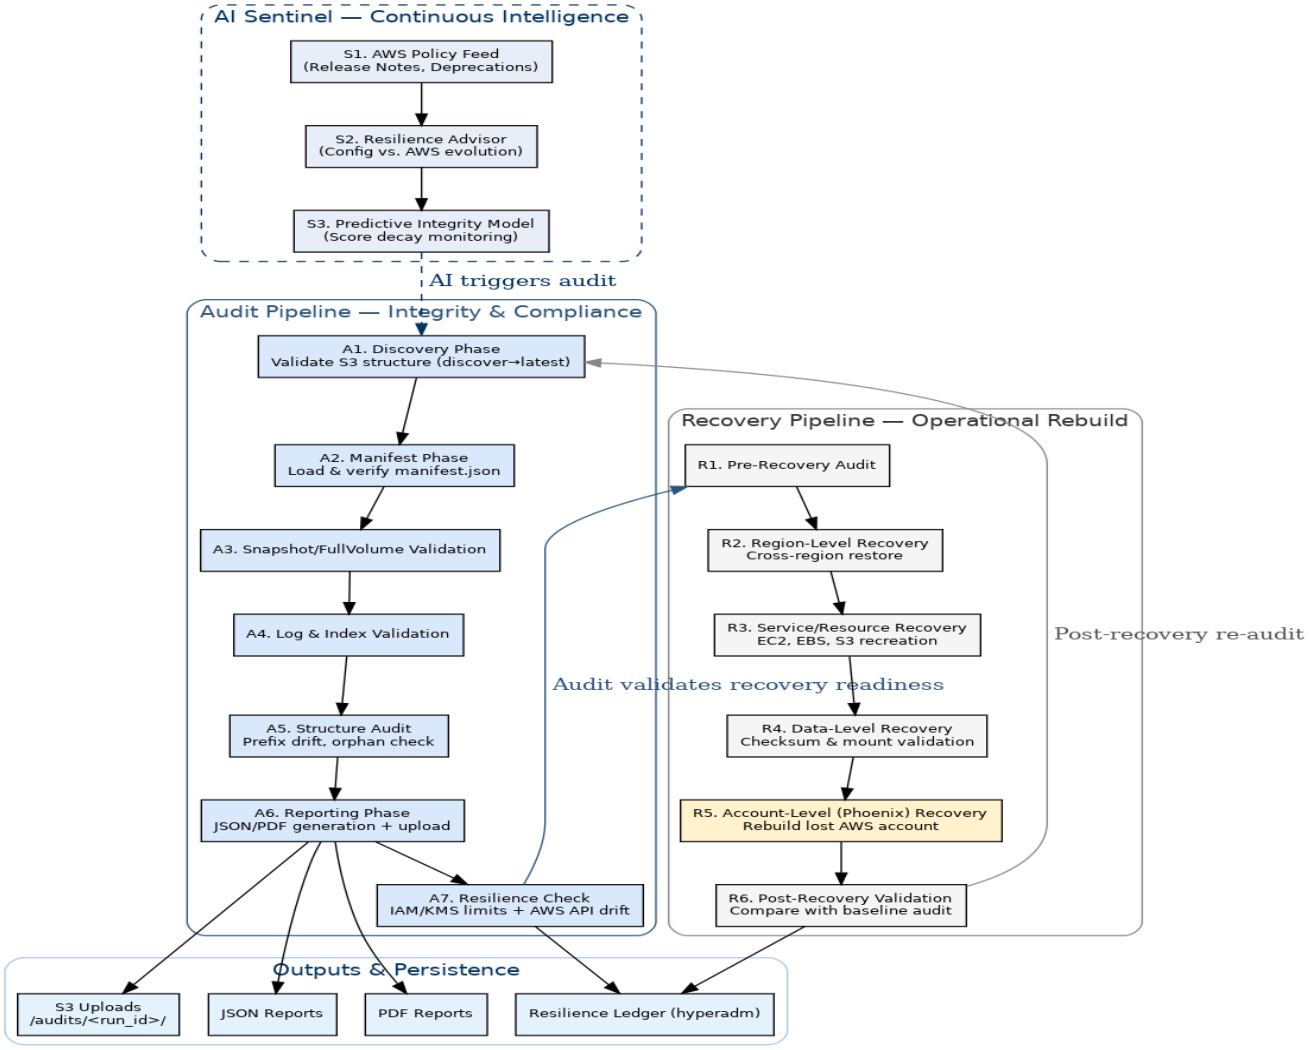

Discovery, Manifest, Snapshot Validation, Structure Audit, Reporting, Resilience Check.

***Recovery Pipeline (R1–R6)** — Operational Rebuild*

Pre-recovery audit, region restore, service recovery, Phoenix account rebuild, post-recovery validation.

***AI Sentinel** — Continuous Intelligence Layer*

Policy feed ingestion, resilience advisor, and predictive degradation detection.

Outputs: JSON + PDF reports, S3 uploads, Hyperadm ledger persistence.
